Dear Customer,

Re: RoHS compliance for product range D01-E01XXXX.

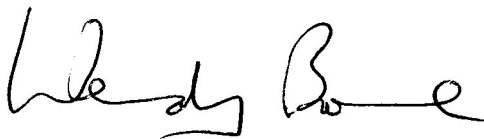

I can hereby confirm that the above product range is fully compliant to the RoHS legislation, otherwise known as the EC Directive 2002/95/EC on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment (RoHS). The product range is constructed with the following:

D01-E01XX42 (XX = Total no. of contacts):

- The connector moulding is PPS - this plastic is fully compliant, and is also resistant to the higher soldering temperatures evident in lead-free soldering processes.
- The contact shell is Brass – although this contains a small percentage of lead, the legislation allows for up to 4% lead content within copper alloys.
- The contact shell plating is 100% Tin over Nickel, and is therefore fully compliant.
- The contact clip is Beryllium Copper – although this may contain a trace percentage of lead, the legislation allows for up to 4% lead content within copper alloys.
- The contact clip plating is Gold over Nickel, and is therefore fully compliant.

If you have any further questions regarding this letter, please do not hesitate to contact me.

Yours faithfully,

Miss Wendy Jane Bourne, BEng
Technical Support Engineer & RoHS Compliance Project Manager
