Monday 17th March, 2008

Dear Customer,

Re: RoHS compliance for product range M80-25300XX and M80-25400XX.

I can hereby confirm that the above product ranges are fully compliant to the RoHS legislation, otherwise known as the EC Directive 2002/95/EC on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment (RoHS). The product ranges are constructed with the following:

M80-2530042, M80-2540042:

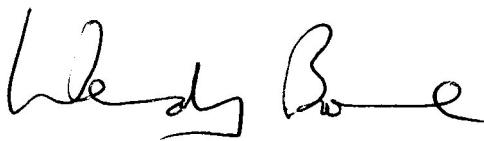

- The contact is Beryllium Copper – although this may contain a trace percentage of lead, the legislation allows for up to 4% lead content within copper alloys.
- The contact plating is Gold on the contact are, 100% Tin on the crimp area, all over Nickel, and is therefore fully compliant.

M80-2530045, M80-2540045:

- The contact is Beryllium Copper – although this may contain a trace percentage of lead, the legislation allows for up to 4% lead content within copper alloys.
- The contact plating is Gold over Nickel, and is therefore fully compliant.

If you have any further questions regarding this letter, please do not hesitate to contact me.

Yours faithfully,

Miss Wendy Jane Bourne, BEng
Technical Support Engineer & RoHS Compliance Project Manager
