Dear Customer,

Re: RoHS compliance for product range M22 Pin Header Variants.

I can hereby confirm that the above product range is fully compliant to the RoHS legislation, otherwise known as the EC Directive 2002/95/EC on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment (RoHS). The product range is constructed with the following:

M20-xxxxxxExx05, M20-xxxxxxFxx05, M20-xxxxxxHxx05, M20-xxxxxxjxx05, M20-xxxxxxKxx05, M20-xxxxxxLxx05, M20-xxxxxxSxx05, M20-xxxxxxTxx05, M20-xxxxxxVxx05, M20-xxxxxxWxx05:

- The connector moulding is Nylon 6T - this plastic is fully compliant, and is also resistant to the higher soldering temperatures evident in lead-free soldering processes.
- The contact is Brass – although this contains a trace percentage of lead, the legislation allows for up to 4% lead content within copper alloys.
- The contact plating is Gold over Nickel, and is therefore fully compliant.

M20-xxxxxxExx46, M20-xxxxxxFxx46, M20-xxxxxxHxx46, M20-xxxxxxjxx46, M20-xxxxxxKxx46, M20-xxxxxxLxx46, M20-xxxxxxSxx46, M20-xxxxxxTxx46, M20-xxxxxxVxx46, M20-xxxxxxWxx46:

- The connector moulding is Nylon 6T - this plastic is fully compliant, and is also resistant to the higher soldering temperatures evident in lead-free soldering processes.
- The contact is Brass – although this contains a trace percentage of lead, the legislation allows for up to 4% lead content within copper alloys.
- The contact plating is 100% Tin over Nickel, and is therefore fully compliant.

If you have any further questions regarding this letter, please do not hesitate to contact me.

Yours faithfully,

Miss Wendy Jane Bourne, BEng
Product Engineer & RoHS Compliance Project Manager
