Dear Customer,

Re: RoHS compliance for product range M40-401XXXX.

I can hereby confirm that the above product range is fully compliant to the RoHS legislation, otherwise known as the EC Directive 2002/95/EC on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment (RoHS). The product range is constructed with the following:

M40-401XX46 (XX = No. of contacts per row):

- The connector moulding is Nylon 9T - this plastic is fully compliant, and is also resistant to the higher soldering temperatures evident in lead-free soldering processes.
- The contacts are Phosphor Bronze – although this may contain a trace percentage of lead, the legislation allows for up to 4% lead content within copper alloys.
- The tabs are Brass – although this may contain a trace percentage of lead, the legislation allows for up to 4% lead content within copper alloys.
- The contact plating is 100% Tin over Nickel, and is therefore fully compliant.

If you have any further questions regarding this letter, please do not hesitate to contact me.

Yours faithfully,

Miss Wendy Jane Bourne, BEng
Technical Support Engineer & RoHS Compliance Project Manager
