Friday 30th March, 2007

Dear Customer,

Re: RoHS compliance for product range M80-763XXXX.

I can hereby confirm that the above product range is fully compliant to the RoHS legislation, otherwise known as the EC Directive 2002/95/EC on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment (RoHS). The product range is constructed with the following:

M80-763XX42 (XX = Total no. of contacts):

- The connector moulding is Nylon 46 - this plastic is fully compliant, and is also resistant to the higher soldering temperatures evident in lead-free soldering processes.
- The contact pin is Phosphor Bronze – although this may contain a trace percentage of lead, the legislation allows for up to 4% lead content within copper alloys.
- The contact pin plating is Gold on the contact area, 100% Tin on the tails, all over Nickel, and is therefore fully compliant.
- The latch is Beryllium Copper – although this may contain a trace percentage of lead, the legislation allows for up to 4% lead content within copper alloys.
- The latch plating is Nickel, and is therefore fully compliant.

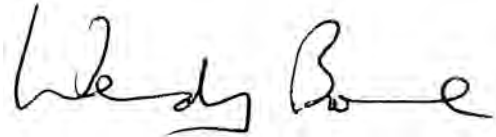

M80-763XX45 (XX = Total no. of contacts):

- The connector moulding is Nylon 46 - this plastic is fully compliant, and is also resistant to the higher soldering temperatures evident in lead-free soldering processes.
- The contact pin is Phosphor Bronze – although this may contain a trace percentage of lead, the legislation allows for up to 4% lead content within copper alloys.
- The contact pin plating is Gold over Nickel, and is therefore fully compliant.
- The latch is Beryllium Copper – although this may contain a trace percentage of lead, the legislation allows for up to 4% lead content within copper alloys.
- The latch plating is Nickel, and is therefore fully compliant.
